DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 31-34 are rejected under the judicially created doctrine of non-obviousness-type double patenting as being unpatentable over claims 1-2 of U.S. Patent No. 6,631,694. Although the conflicting claims are not identical, they are not patentably distinct from each other because both disclose a teat cup liner series comprising in combination a plurality of related teatcup liners. The liners having upper mouthpieces, an intermediate barrel wall and a lower connecting tube; the barrel receiving the teat through the mouthpiece. The teatcup liner series comprising liners L_1 through L_n having a selected second parameter which varies wherein the barrel wall has a transverse thickness measures transversely to the axial direction and wherein the first parameter is the thickness of the lip of the mouthpiece. The axial thickness of the lip continually increases and the transverse thickness of the barrel wall continually decreases from L_1 to L_n .

Allowable Subject Matter

Claims 1-30 are allowed.
